

## Meeting the Mandates

**idWorx! is a complete software solution that allows contractors and DoD facilities to meet both UID and RFID mandates. idWorx! is both easy to install and use, allowing users to quickly get up to speed with the mandates.**

### idWorx! Software Suite

#### Enterprise Base Application

- ★ Each Enterprise Base installation may have an unlimited number of user PC installations to allow widespread access to UID and RFID data throughout the organization.
- idWorx! scales from the single-user supplier up to the enterprise class contractor with multiple facilities and sub-contractors.

#### Software Modules

- ★ DoD UID – Built for shipments that need UID associations. Allows for submittal to UID Registry and WAWF.
- ★ DoD RFID – This module is used for shipments that need RFID and/or UID data associations. Allows submittal to UID Registry and WAWF.
- ★ DoD Base – Allows bases that have Legacy UID requirements to mark legacy items and submit them to the UID Registry.
- ★ DoD GFP – This module allows contractors to associate and submit their Government Furnished Property to the UID Registry.
- ★ WAWF Manager – For contractors who don't need UID or RFID, but still want automated, electronic submission to WAWF in order to help expedite shipment submittals.
- ★ AIA Manager – Allows contractors to export and import UID information, including assembly relationships, into and out of idWorx!.

### Hardware Specification

#### Base Unit

- ★ Client Station – Any computer running Windows XP or Windows 2000 with a 2.0 GHz processor or higher.
- ★ Server Station – Database server recommendations depend on workload. Operating system must support SQL Server 2000 or higher.

#### UID

- ★ Printing recommendations depend on items that need to be UID marked. Items that just need a label can use any polyester label printer. Direct Markable parts will need either a Dot Peen or Laser printer device.
- ★ Verification of quality of UID Marks can be accomplished with any compatible UID Verifier device such as those manufactured by Cognex, Siemens, or Microscan.

#### RFID

- ★ Printing – Any compatible RFID printer such as Zebra or Printronix can be used. idWorx! can support almost any RFID printer.
- ★ Reading – idWorx! integrates with many RFID readers such as those manufactured by Alien and Symbol.

### idWorx! Software Suite

- ★ InfinID Technologies Inc. provides a comprehensive range of professional services and maintenance in support of the idWorx! software suite to ensure your success in DoD mandate compliance. InfinID Technologies Inc. also has certified resellers across the United States. There is always someone close by to help you with idWorx!
- ★ RF Product Analysis for RFID
- ★ UID marking analysis of products
- ★ ERP Integration Services
- ★ Hot Swap Printer Maintenance
- ★ Software Maintenance
- ★ Telephone Support
- ★ Installation
- ★ Training
