

idWorx! RFID Product Comparison

InfinID offers an array of product suites, one of which will be perfect for your needs.

idWorx! RFID Standard Edition

The idWorx! RFID Standard Edition is designed for the company that wants to start by getting up and running with the DoD mandates as simply as possible and at the lowest cost. Utilize all of the workflows used for activities such as printing RFID tags and associating them to your shipments. RFID Standard Edition provides standardized printing templates and printing devices, allowing for a much simpler setup process. Although submission of shipment and RFID data is limited to a web browser interface, the idWorx! reporting tools allow for effective communication between departments on what data needs to be entered. No more fumbling with spreadsheets and paper hardcopies to accurately determine what your shipment composition was. You can install RFID Standard Edition on as many computers as needed, but only one person is allowed to be logged in at a time.

idWorx! RFID Extended Edition

The idWorx! RFID Extended Edition is ideal for the company that is just starting out with the mandates. RFID Extended Edition provides all of the RFID capabilities required by the DoD such as creating RFID tags, adding them to shipments, and submitting your RFID shipments electronically to WAWF. RFID Extended Edition is designed to be hardware agnostic, giving you the choice over what hardware you use to print, scan, and verify your RFID tags. You can install RFID Extended Edition on as many computers as needed, but only one person is allowed to be logged in at a time. RFID Extended Edition is a great choice for beginners in the DoD mandates arena.

idWorx! RFID Enterprise Edition

idWorx! RFID Enterprise Edition provides the most flexible package to high-end customers. It provides all of the flexibility that the Extended Edition does, such as creating RFIDs, verifying them, associating them to shipments, and submitting electronically to WAWF. In addition to this, RFID Enterprise Edition also lets you decide how many concurrent users you need. This is especially critical for high volume manufacturers that need to have multiple departments working with idWorx! at the same time. You can start out with the 5-pack and as the business demand grows, you can increase idWorx! capabilities along the way. Adding additional users is easy through our web-based licensing system.
