

UID NEWS AT A GLANCE

August 22, 2007

One Millionth UID Submitted to Registry

InfinID Technologies is pleased to announce that one of its customers, Insight Technologies, has recently submitted the one millionth UID to the UID Registry. InfinID Technologies continues forward as a trailblazer in the DoD software arena. Look forward to hearing more exciting news about InfinID Technologies and its customers.

MIL-STD 130M Change 1 Released

The DoD has just officially released MIL-STD 130M Change 1. This document essentially adds AIM direct part marking standards. Visit www.InfinIDTech.com to download a copy of the new document.

UID and RFID Label Services

InfinID Technologies is now offering label printing services for all of your UID and RFID needs. From serial formulas to printing templates, customize your jobs to fit your company requirements. Additionally, InfinID Technologies can also submit your UIDs to the UID Registry for you. Throughout the process, InfinID Technologies provides the guidance to make your mandate requirements as simplified as possible. This is an ideal choice for a company that has UID or RFID requirements, but isn't quite ready to buy idWorx! yet.

WAWF Version 3.0.12

Wide Area Workflow has announced the upcoming release of version 3.0.12. The new release has required file structure changes and all customers who submit electronically to WAWF must be compliant no later than October 31st, 2007. Visit www.InfinIDTech.com to download a copy of the new file description.

idWorx! Standard Edition Available

InfinID Technologies is now offering idWorx! Standard Edition. idWorx! Standard Edition provides a great, low-cost step into the UID and RFID mandates. It is ideal for a low volume company, providing all of the features as idWorx! Extended without submission capabilities. Manage your company products, contracts and shipments as well as printing and scanning processes all within a single integrated package.

InfinID Technologies has Moved!

InfinID Technologies has moved its development and sales branch to bigger and better facilities. The new, larger facilities will provide enough room for our expanded sales and service team. The new location is 1 West Mountain St #12, Pasadena, CA, 91103.

New InfinID Technologies Whitepaper

Check out the latest whitepaper from InfinID Technologies. Enterprise Businesses and Defense describes the success story of Siemens as they became UID compliant. Walk along with Siemens as they solve tough problems such as coordinating with manufacturers and working in disconnected environments. This whitepaper is a must-read for anyone who is getting started with the mandates or simply for anyone who is interested in creative large scale DoD business solutions.
